

Smarter.PMO Dashboard Application with QlikView

Maximise programme performance

The Smarter.PMO Dashboard Application solution, allows you to see your programme in new ways. Deeper and broader insight into your project information drives operational efficiency, improves your ability to anticipate risks and increases earned value. Controlled agility helps you better anticipate and effectively act on changing project variables to improve quality.

Reinforce governance and control

The Smarter.PMO Dashboard Application allows you to easily govern and control the structures and processes across your programme. It facilitates engagement with the stakeholders making accountability real. Structural anomalies are instantly identified for correction while externally driven changes can be managed by the Smarter.PMO minimising disruption to individual projects.

Enable common understanding and foster collaborative improvement

Having a single view of all project disciplines from safety to cost management & risk to project scheduling enables you and your teams to make the right decisions at the right time. The Smarter.PMO Dashboard Application encourages collaboration to manage current issues and more importantly empowers you to make the required process changes to prevent issues recurring. Your project disciplines can then continually learn from and improve their combined performance while reducing time spent firefighting.

Smarter programme delivery

The Smarter.PMO Dashboard Application provides a framework for:

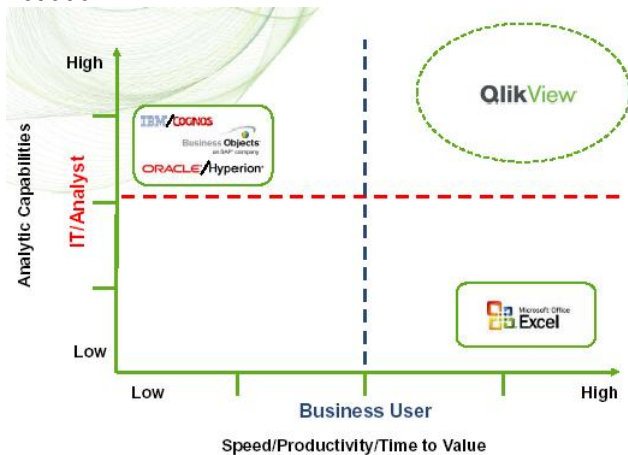

- Anticipating and effectively acting on changing needs and opportunities;
- Delivering the fundamental principles of quality;
- Agile decision making, monitoring and reporting;
- Understanding and mitigating risks;
- Maintaining transparent processes and information;
- Joining the flow of information within the organisation and offering wider community collaboration

Smarter.PMO Dashboard Application solution for programme and project managers to address their need to report from dial to detail on a timely basis. Supported by a Self-Service BI data centric QlikView GreenStack architecture. Offering accelerated time-to-report, time-to-decide, and time-to-value. Delivering operational excellence and competitive advantage to our clients.

Rapid deployment, rapid payback

Unlike traditional BI tools, which take many months - even years – to position, implement and see results, QlikView is deployed in a matter of days or a few weeks—often not even requiring extra technology to run on during prototyping. This means low investment and rapid payback that can be measured in days or weeks – instead of months, years, or not at all.

OneView methodology – enterprise enabled with application templates

Differentia Consulting has recognised a need for a robust methodology for implementing QlikView in the Enterprise and that business users need functional templates to help drive adoption, fast track projects, and generally assist in providing a rapid return to the business. We have developed **OneView** – a methodology which includes best practice for implementing QlikView, together with a series of business templates and example functional QlikView documents offering best practice use of the product.

Our **OneView** methodology caters for both tactical and strategic / business-critical use of QlikView and hence in addition to document design and build also covers all the technical aspects of implementing QlikView in an Enterprise, including:

- Data architecture and system governance;
- Document change control;
- Security;
- System administration and QA;
- Performance monitoring;
- Resilience - DR and High availability
- Infrastructure sizing and deployment options including cloud-based.

Complete solutions offering

Differentia Consulting is an Elite solution partner offering the highest quality of services available. Our services team deliver both onsite and offsite; QlikView application configuration, deployment, management and support services. Differentia Consulting also offers a full set of application and infrastructure Managed Services for our clients that include ongoing support services, fully hosted and/or managed solutions on premise or in the cloud (PaaS).

What your peers say

“The QlikView Smarter.PMO Dashboard Application puts all of our project information in one place and has cut more than a week’s effort per month from our reporting cycle. The greatest benefits though are having integrated information across all project disciplines enabling us to quickly identify opportunities and issues and providing package level insight in minutes as opposed to days.

Differentia Consulting delivered this enterprise ready solution in less than one tenth of the time of a comparable BI offering meaning we achieved full ROI in under three months.” - G Grimmond, Programme Controls Lead, Mott MacDonald Ltd.
