Oracle JD Edwards EnterpriseOne

Investment. Delivery. Proof

"…we have an extremely satisfied group of JD Edwards customers and our intent is to continue to invest in, enhance and improve that product line … and simultaneously giving you a graceful bridge so if you chose to move to Fusion this year or ten years from now … you have that option.

But we're certainly not going to induce you to move to Fusion by de-investing in JD Edwards. That's something we're going to invest in this year, next year, five years from now, ten years from now … that's a very important and strategic product line for us."

Larry Ellison – CEO – Oracle Corporation – speaking at Oracle OpenWorld 2012
