

Your Health Check

As a leading UK Qlik partner, we pride ourselves on offering you top-tier services that empower your organisation to leverage the full potential of Qlik Sense and QlikView. We would like to introduce our comprehensive **Qlik Health Check Service**, designed to optimise your Qlik environment, data models, content, and applications. Our Qlik Health Check Service will ensure peak performance and a seamless user experience, aligned to your decision making strategy.

Our Qlik Health Check service is divided into the following essential components:

Infrastructure Assessment

Our team of experts will thoroughly evaluate your current infrastructure setup, including hardware, software, and network configurations to identify bottlenecks, potential risks, and areas for improvement. By optimising your infrastructure, we can help you achieve faster response times, increased stability, and scalability that grows with your business.

Data Model Analysis

Data is the backbone of any analytics platform, and the effectiveness of your Qlik solutions are dependent on the quality and efficiency of your data models. We will perform a deep dive into your data model to examine data sources, table structures, and relationships to identify any inconsistencies, inefficiencies, or redundancies. This analysis will pave the way for improved data quality, more accurate reporting, and faster data processing.

Application Review

Our Qlik Health Check service will examine your Qlik applications and evaluate the design, performance, and usability of your dashboards, visualisations, and reports.

By optimising your applications, we can help you deliver a more intuitive, efficient, and engaging user experience to your team, and drive superior decision-making and business results.

Your Health Check

Strategic Assessment

A clear understanding of your organisation's data strategy is crucial to ensure that your Qlik solutions are aligned with your business goals. Our Qlik Health Check service includes a comprehensive review of your data strategy, and will both identify gaps and provide recommendations to help you create a more effective and efficient data strategy. This review will enable your organisation to extract the maximum amount of value from your Qlik investments.

Data Literacy Assessment

To drive informed decision making, your team must be empowered with the skills and knowledge to effectively interpret and utilise data. Our Qlik Health Check service will evaluate your organisation's data literacy deficit, and identify areas where strategic workshops, user training, or support may be needed. Enhanced data literacy across your team, will foster a culture of data-driven decision-making and unlock the true potential of your analytics platform.

Security and Compliance Check

Protecting your data and ensuring compliance with industry regulations is of utmost importance. Our Qlik Health Check service includes a thorough security and compliance review, which will examine access controls, data protection measures, and adherence to relevant regulations.

We'll identify any vulnerabilities or potential compliance issues, and provide you with peace of mind while safeguarding your organisation's reputation.

If your Qlik environment is underperforming it will cost your organisation dearly.

Schedule your Qlik Health Check with our team of experts today and unlock the full potential of your analytics platform.

Contact us now to discuss your unique needs and requirements.
