

**Business discovery on the go.** QlikView provides professionals on the go with the Business Intelligence industry's most powerful and engaging mobile experience. It features a compelling user interface fueled by the power of QlikView Server to deliver unprecedented freedom to mobile workforces. Users can simply jump in and become instantly productive.

Mobile users get all the power and flexibility of QlikView Business Discovery when connected, and can take advantage of offline access as well. Users get a complete QlikView Business Discovery experience, including interactive analysis, rich visualization and Associative Experience via mobile devices.

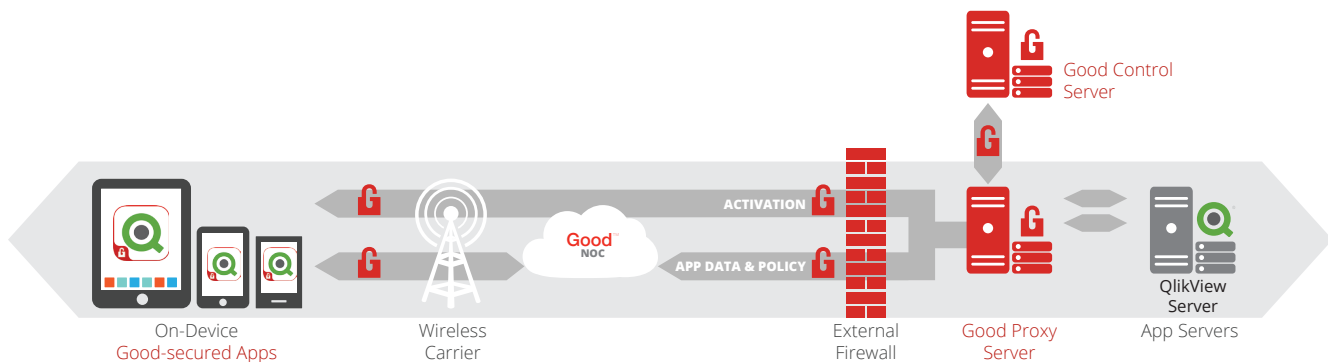

## QLIKVIEW FOR GOOD: SECURE PLATFORM FOR MOBILE DECISION MAKERS

QlikView for Good is the QlikView application secured by the Good Dynamics® Secure Mobility Platform. The communication between QlikView for Good app and the QlikView infrastructure is secured through using Good Dynamics platform while providing IT with the means to protect corporate data and meet security policies even as mobile services continue to expand enterprise-wide.

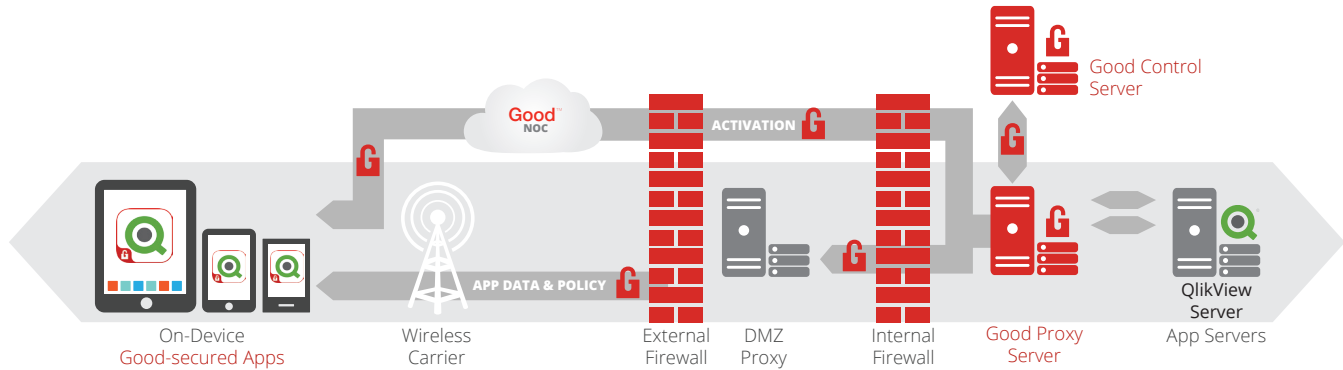

QlikView for Good is a fully integrated, secure and scalable joint solution for QlikView mobile business users on the Good Dynamics platform (leveraging Good Dynamics SDK). Amongst other capabilities, QlikView for Good offers container management (wipe, lock) and policy management (password, device, OS).

## NETWORK ARCHITECTURE

QlikView for Good can be easily incorporated into a Good Dynamics environment making it easy to deploy following Good Dynamics standards. For example, in the case that the cloud-based Good Dynamics Network Operation Center (NOC) is to be leveraged, QlikView infrastructure can be set up behind the firewall ensuring that the QlikView for Good communicates with the QlikView Server via the configured firewall ports. QlikView applications that can be accessed via QlikView for Good make it easy for organizations to use corporate resources in a secure manner.

Similarly, QlikView for Good can also be deployed using Good Dynamics Direct Connect deployment option leveraging either off-the-shelf proxy or the Good Proxy server in order to have better control on how the data within QlikView Business Discovery applications flows to and from the corporate network providing a better user experience.

## WHY QLIKVIEW FOR GOOD?

### FEATURES OF THE JOINT SOLUTION

### RELATED BENEFITS

Online Discovery & Offline Views	Delivers the “best of both worlds” allowing QlikView apps to be run in online mode (live data) and users to define views for caching and offline access
Existing QlikView Apps Useable	Existing QlikView apps work in QlikView for Good, without additional development or cost
Secure App Deployment	Deploy BI apps to BYOD with total confidence
Encrypted App Connections	Create encrypted BI app connections through the Good Technology Network Operations Center (NOC)
Automated Policy Enforcement	Automates policy enforcement with a full set of policy controls providing IT with the required management for MDM-enrolled devices as well as centralized deployment capabilities
Build Once Deploy Anywhere	Allows for a ‘build once deploy anywhere’ approach, reducing redundant effort and improving standards
