Power BI Managed Services

Power BI is a powerful business intelligence tool that can help you transform your data into insightful visualisations and reports. With Power BI, you can easily connect to different data sources, model your data, and create interactive dashboards that allow you to explore your data and make faster, better, data-driven decisions.

At Differentia Consulting, we specialise in Power BI delivery as part of a Managed Service package. Our team of experts can help you unlock the full potential of Power BI and use it to drive your business forward.

Expert development resource

Our team of experienced Power BI developers can help you design and build custom solutions that meet your unique business needs. We can help you connect to your data sources, build data models, create interactive reports and dashboards, and automate your data workflows.

Flexible engagement model

We offer flexible engagement models to suit your needs. Whether you need a short-term development project or ongoing managed services, we can provide the resources you need to succeed with Power BI.

Ongoing Support

We provide ongoing support to ensure your Power BI solution remains up-to-date and continues to meet your evolving business needs. Our team of experts can help you troubleshoot issues, optimise your solution, and provide training and guidance to help you get the most out of Power BI.

CONSULTING

Our Expertise

Differentia Consulting is a proven data analytics company, based in the UK with over 300 customers operating across the world. Our expertise is in implementing and managing data analytics and ERP solutions for all types of industry sectors and size of company, from global FTSE businesses to small SMEs.

Connecting to Data Sources

We can work with you to connect to and manage various data sources so that your data is easily accessible and up-to-date. We can also help you identify new data sources that may be useful for your business.

Data Modelling

We can transform and model your data so that it is ready for analysis. We call this state "business ready". This includes creating relationships between tables, defining calculated columns and measures, and creating hierarchies to group data together. By working with us, you can ensure that your data is optimised for analysis by end users.

DAX (Data Analysis Expressions)

Our team can help you create custom calculations using DAX to better analyse your data and gain deeper insights. We can also help you optimise your DAX formulas for maximum performance.

Our Expertise

Dashboards

We can create visually appealing and interactive reports and dashboards that enable you to easily interact with your data and gain deeper insights. We'll work with you to create the types of visualisations that are most useful for your business and customise them to your needs.

Power Query

We can help you use Power Query to transform and clean your data from multiple sources, filter and merge tables, and more. Our experts can ensure that your data is transformed and cleaned effectively and efficiently.

Power BI Service

We can help you publish and share your reports and dashboards with others, enabling you to collaborate and communicate insights in a governed, secure way and with ease. We can also help you set up security and access controls to ensure that your data is protected.

By partnering with us, you can leverage our expertise in Power BI to help you unlock the full potential of your data and drive your business forward. We'll work closely with you to ensure that your Power BI solution meets your needs and delivers meaningful insights.
